

BUILD ARTIFACT 1: SCORING MODIFIER LOOKUP TABLE

Every multiplier in the opportunity equation, with exact values | Decimal Technologies

WHY THIS EXISTS

The master equation is defined in M2-EQUATION-001 / RISK-002:

Effective Opportunity = Dynamic_Score x (ICS/100) x Stage_Bonus x Budget_Modifier x Entrenchment_Modifier x Risk_Modifier x Window_Multiplier

Decision Score = Effective Opportunity x (Strategic_Readiness/100) / Capital_Cost

Each modifier's exact value is defined in the rules, but scattered across Sections 1-3. This table consolidates every value into one place so two engineers implementing the scoring engine produce identical results. Every value below is traced to its source rule ID.

Worked example (from BUDGET-005): Account with Dynamic_Score 90, ICS 80, EVALUATING stage (x1.3), UNFUNDED budget (x0.5) = $90 \times 0.80 \times 1.3 \times 0.5 = 46.8$ Effective Opportunity. A 'hot' looking account collapses to mid-tier once budget reality is applied — which is the entire point of the modifier chain.

BASE: Dynamic Score Dimensions (SCORE / EXPLAIN-002)

Dimension	Weight	Source
Signal Strength	35%	Section 4 Scoring
Regulatory Pressure	30% (rises to 40% if REGULATORY_MANDATORY initiative)	INITIATIVE-002
Persona Reachability	20%	Section 4 Scoring
Relationship Warmth	15%	Section 4 Scoring
	Dynamic_Score = sum of (dimension_score x weight), range 0-100	

MODIFIER 1: Stage_Bonus (Buying Journey — JOURNEY/Stage rules)

Buying Stage	Stage_Bonus	Source
EVALUATING / SHORTLISTING	x1.3	Stage-as-Modifier rule (§1 Layer 5)
DEFINING	x1.1	Stage-as-Modifier rule
EXPLORING / AWARE	x1.0 (neutral)	Stage-as-Modifier rule
UNAWARE	x0.9	Stage-as-Modifier rule
PROCUREMENT / NEGOTIATION	x1.2 (late but active)	Stage-as-Modifier rule
CLOSED	x0.0	Stage-as-Modifier rule

MODIFIER 2: Budget_Modifier (BUDGET-005)

Budget Status	Budget_Modifier	Source
ALLOCATED	x1.4	BUDGET-005
APPROVED	x1.2	BUDGET-005
SEEKING	x1.0	BUDGET-005
UNKNOWN	x0.8	BUDGET-005
UNFUNDED	x0.5	BUDGET-005 / BUDGET-002

MODIFIER 3: Entrenchment_Modifier (ENTRENCH / §1 Layer)

Entrenchment	Formula / Value	Source
General formula	$(100 - \text{Entrenchment_Score}) / 100$	§1 Entrenchment rule
FORTRESS (score 80)	x0.20	§1 Entrenchment rule
Deep lock-in (multi-year, integrated)	low modifier (toward 0.2)	VENDOR-ENTRENCH-001
No incumbent	x1.0	derived
Override	Renewal window or dissatisfaction signal suppresses Vendor Entrenchment	VENDOR-ENTRENCH-001

MODIFIER 4: Risk_Modifier (RISK-002)

Component	Formula	Source
Risk_Exposure	sum(probability x impact) across 7 risk categories	RISK-001 / RISK-002
Risk_Modifier	$\max(0.2, 1 - \text{Risk_Exposure}/500)$	RISK-002
7 risk categories	CHAMPION_DEPARTURE, BUDGET_KILL, COMPETITOR_DISPLACEMENT, REGULATORY_DELAY, PROCUREMENT_FREQUENTLY_CHANGED, REVENUE_FAILURE, STRATEGIC_FAILURE	RISK-001
Alert thresholds	Any single risk >70% = alert. Total Exposure >250 = DEAL_AT_RISK flag	RISK-003

MODIFIER 5: Window_Multiplier (TIMING — P4_P5 Architecture)

Window State	Window_Multiplier	Source
OPEN	x1.5	Window Multiplier rule (§1 P4)
CLOSING	x1.2	Window Multiplier rule
OPENING	x0.5	Window Multiplier rule
CLOSED	x0.1	Window Multiplier rule
CLOSED_AGAIN	x0.0	Window Multiplier rule
Narrative boost	Signal intersecting accelerating narrative or Strategic Multiplier	Vendor Entrenchment

ICS — Intelligence Confidence Score (gates intent)

Aspect	Specification	Source
Formula	$\text{source_reliability} \times \text{freshness} \times \text{corroboration} \rightarrow \text{ICS (0-100)}$	Section 3 M0
Action floor	$\text{ICS} \geq 40$ required to promote to HOT/TIER_1	GOV-ICS-001
Review-scrutiny gate	$\text{ICS} < 60$ triggers mandatory reasoning-chain expansion	HUMANREVIEW-003
Effect in equation	Multiplied as $(\text{ICS}/100)$ so low confidence cannot inflate priority	M2-EQUATION-001

CRITICALITY ADJUSTMENTS (INITIATIVE-002) — applied to dimensions, not as multiplier

Initiative Criticality	Effect	Source
REGULATORY_MANDATORY	Regulatory Pressure weight 30% -> 40%	INITIATIVE-002
STRATEGIC_MANDATORY	+10 bonus to Dynamic Score	INITIATIVE-002
REVENUE_CRITICAL	no modifier	INITIATIVE-002
EFFICIENCY_IMPROVEMENT	-5	INITIATIVE-002
NICE_TO_HAVE	-15	INITIATIVE-002

PROJECT MATURITY (MATURITY-001) — 9-stage score, informs Stage_Bonus mapping

Maturity Stage	Score	Maturity Stage	Score
IDEA	10	REQUIREMENTS_DEFINED	75
DISCUSSION	20	VENDOR_EVALUATION	85
SPONSOR_IDENTIFIED	35	PROCUREMENT	90
BUDGET_REQUESTED	45	IMPLEMENTATION	95
BUDGET_APPROVED	60	—	—

CHAMPION STRENGTH SCORE (5 dimensions — used by M14, not the core equation)

Dimension	Weight	Scale	Source
Budget Authority	25%	DIRECT_CONTROL=100, INFLUENCE=60, REQUEST_ONLY=30, NONE=0	\$1 Champion rule
Organizational Seniority	20%	C_SUITE=100 ... MANAGER=25	\$1 Champion rule
Initiative Ownership	20%	NAMED_OWNER=100 ... UNRELATED=0	\$1 Champion rule
Internal Credibility	20%	tenure + track record + ELEVATED modifier	\$1 Champion rule
Relationship w/ Decimal	15%	MET_IN_PERSON=100 ... NO_ENGAGEMENT=0	\$1 Champion rule
Bands		STRONG 71-100, MODERATE 41-70, WEAK 0-40	\$1 Champion rule

IMPLEMENTATION NOTE

Build this as a single configuration file (e.g. modifiers.json) read by the scoring service — NOT hardcoded. Per RULEREG-RECORD-001, all thresholds and weights live in the Rule_Registry as versioned data. This table is the seed content for that registry. Each value is independently overridable by governed human change (RULEREG-IMMUTABLE-001 distinguishes which are constitutional vs tunable).
